Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 22-39 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 20, 27 and 34 of copending Application No. 10/032,273 in view of claim 13 of copending application 10/032,259. The 10/032,273 application claims all the features as claimed in the instant application except for the valve assembly. The 10/032,259 claims the valve assembly. It would be obvious to a skilled artisan in the mass flow controller field that a valve assembly is required in the mass flow controller to control the flow through the sensor assembly.

This is a provisional obviousness-type double patenting rejection.

Specification

3. The disclosure is objected to because of the following informalities: The specification as currently amended there is a conflict in the reference numerals. In the amendment filed on March 2002, applicant corrected the drawings to change the numeral 121 to numeral 112 as a bypass passage. However, in the current amendment, applicant has corrected the specification back to numeral 121. This does not correspond to the mark up drawings. Appropriate correction is required.
